***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 2, drawn to a purified nucleic acid, classified in class 435, subclass 23.1.
  - II. Claim 3, drawn to a purified protein, classified in class 530, subclass 350.
  - III. Claims 4-11, drawn to a transformed plant, classified in class 800, subclass 278.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, the different inventions have are structurally and functionally distinct. For example, Invention I is drawn to a purified nucleic acid which is composed of nucleotides and functions in methods of nucleic acid hybridization or amplification reactions, whereas invention II is drawn to a purified protein which is composed of amino acids linked by peptide bonds and arrange in complex combinations of alpha helices, beta pleated sheets, hydrophobic and hydrophilic domains. The protein can function in ligand/receptor binding assays or function as a fusion protein with enzymatic functions, and finally, invention III is drawn to a transformed plant which can be altered by introducing a nucleic acid molecule into or rearrangement of genetic material within the plant or plant part. The different inventions are patentably distinct requiring different fields of search which would require an undue burden on the examiner if not restricted.

Art Unit: 1637

3. Because these inventions are distinct for the reasons given above and the search required for any one Group is not required for any other Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cynthia B. Wilder, Ph.D. whose telephone number is (703) 305-1680. The examiner can normally be reached on Monday through Thursday from 9:30 am to 6:30 pm and on Friday from 9:30 am to 1:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on (703) 308-1119. The official fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308 0196.
